

It has been proven over and over that this Petition is a direct attack on WINLINK. Nothing more, nothing less. It has nothing to do with National Security or

It has been proven also,

- A) There is NO ENCRYPTION being Used by Winlink. Real or Imagined.
- B) There is no National Security ISSUE! Real or Imagined.
- C) There is no Malicious Interference in the ACDS segments of the HF Bands.
- D) There is an ability to Monitor Pactor and other similar Modes. You just have to have the equipment and knowledge to do so.
- E) This petitioner does not want and refuses any kind of Cooperation between his group and those he is attacking. When I asked for a cooperative effort to discuss and resolve any of this.. I was told. "Too Little too Late." This was in direct reference to WINLINK's new Online Monitoring tool. So how can this not be about WINLINK when every time we discuss it, it is directly against WINLINK. Yet no cooperation is allowed.

In fact, when the ARRL tried to hold meetings in good Faith, the petitioner was unwilling to negotiate. it's an ALL or nothing. As far as Koliark and crew are concerned.

Give them nothing then. Dismiss, this Petition. And Move forward with 16-239. Immediately without delay. Lets Join the rest of the World in the 21st Century of Amateur Radio.
